Professional Summary

Operations Director with 10+ years of experience building and scaling global content operations, vendor programs, and cross-functional initiatives across streaming, media, and entertainment. Proven track record bringing structure to complex, ambiguous environments, building scalable operating models, launching new capabilities, and leading distributed teams and partner ecosystems across 50+ countries.

Professional Experience

Director of Quality Control | International Digital Centre

August 2026 – Present

- Lead IDC's global Quality Control organization, establishing operational strategy, quality standards, and scalable management systems.
- Direct global quality operations supporting Netflix and other clients, spanning multiple service lines and vendor partners, and supporting 100+ specialists across 50+ countries.
- Own departmental KPIs, quality governance, executive reporting, and strategic initiatives, partnering with Executive Leadership, Engineering, Production, Client Services, and Compliance.
- Drive operational strategy and continuous improvement across high-volume global programs, balancing quality, speed, risk, and scalability.
- Lead quality investigations and root-cause analysis, translating complex operational issues into corrective actions and scalable process improvements.
- Develop and coach quality leaders and teams while driving organizational capability, process maturity, and strategic initiatives

Vendor & Partner Operations Manager | International Digital Centre

April 2019 – August 2026

- Architected and scaled global operating frameworks spanning onboarding, operational readiness, training, performance management, and partner governance, enabling expansion from 10 to 100+ vendors across 50+ countries.

- Managed end-to-end operational delivery for two global Netflix content operations programs, overseeing execution, performance, and coordination of 100+ specialists across 50+ countries.
- Designed and implemented automated workflows using Google Workspace APIs and Python, eliminating manual processes, reducing processing time from weeks to hours, and improving scalability and data accuracy.
- Owned partner performance metrics, SLAs, KPIs, executive reporting, and vendor governance across 100+ global vendor partners.
- Managed the full vendor lifecycle, including onboarding, budgeting, SOW development, RFP support, contract coordination, vendor negotiations, and commercial reporting.
- Coached and developed a team of three direct reports, providing performance guidance, professional development, and leadership support.

Global Asset Management Consultant | Warner Music Group

March 2015 – April 2019

- Managed global content operations for major and independent record labels, overseeing metadata governance, digital release workflows, and worldwide distribution, including Grammy Awards submission production.

Quality Control Technician | Deluxe Entertainment Services Group

February 2014 – February 2015

- Performed technical quality control on Blu-ray, DVD, and streaming assets, coordinating issue resolution across editorial, engineering, operations, and client teams.
