PROFESSIONAL SUMMARY

Content Operations Leader with 10+ years of experience managing end-to-end media supply chains, localization workflows, and partner delivery ecosystems across global streaming and entertainment. Currently directing IDC's Quality Control organization, overseeing quality standards, workflows, KPIs, performance management, and continuous improvement across multiple business units. Proven track record scaling content operations, managing global programs and vendor networks, and using data and automation to improve quality, efficiency, and scalability.

PROFESSIONAL EXPERIENCE

Director of Quality Control | International Digital Centre *August 2026 – Present*

- Direct IDC's global Quality Control organization across multiple business units supporting subtitles, closed captions, primary/dubbed audio, Audio Description, dialogue transcription, and other media assets.
- Establish quality standards, operational playbooks, review protocols, and scalable management systems to improve consistency, accountability, and execution.
- Own departmental KPIs, quality governance, executive reporting, and performance management, partnering with Executive Leadership, Engineering, Production, Client Services, and Compliance.
- Drive continuous improvement across high-volume content operations through performance analysis, root-cause investigation, process redesign, corrective action, and scalable quality controls.
- Develop and coach quality leaders and teams, establishing clear expectations, accountability, and scalable management practices.

Vendor & Partner Operations Manager | International Digital Centre *April 2019 – August 2026*

- Architected and scaled global operating frameworks spanning onboarding, operational readiness, training, performance management, and partner governance, expanding from 10 to 100+ vendors across 50+ countries.
- Managed end-to-end operational delivery for two global content operations programs supporting major streaming platform clients, overseeing 100+ specialists executing operations across 50+ countries.
- Designed KPI, SLA, and performance-management frameworks to monitor quality, productivity, delivery, and operational performance across a global ecosystem.
- Built automated operational workflows using Python and Google Workspace APIs, reducing payment processing from weeks to hours while eliminating manual calculation errors and improving data accuracy.
- Managed vendor lifecycle processes including onboarding, budgeting, contracts, negotiations, and commercial reporting.
- Coached and developed direct reports while establishing accountability structures across complex operations.

Global Asset Management Consultant | Warner Music Group (via MBO Partners) *March 2015 – April 2019*

- Managed global content operations for major and independent record labels, overseeing DDEX metadata, digital asset workflows, release operations, and worldwide distribution through internal processing and partner delivery systems.

Quality Control Specialist | Deluxe Media *February 2014 – February 2015*

- Performed technical QC on Blu-ray, DVD, and streaming assets, coordinating issue resolution across localization, encoding, authoring, and account management teams and working with master assets, XML metadata, and delivery specifications.

EDUCATION

Bachelor of Music (Music Technology) | New York University | Spring 2010 (Graduated with Honors)
Coursework: Audio-visual media production, post-production workflows, creative and technical project management.
